Salah satu alat yang berguna untuk installasi jaringan, tang ini memiliki fungsi sebagai pembantu pemasangan Konektor RJ45 ke kabel UTP (Unshield Twisted Pair) yaitu ....

⊙ 1 point

Alat untuk mengecek koneksi sambungan kabel **LAN** RJ 45 dan RJ 11. Dilengkapi dengan lampu indikator, tombol pengatur kecepatan pengecekan, serta baterai dan kantong kecil, yaitu .....

Berikut termasuk pemasangan kabel UTP jenis . . .

answer choices

- Straight Trough Cable
- Roll Over Cable

- Cross Over Cable
- Square Trough Cable

Berikut keunggulan Fiber optic dibandingkan dengan Coaxial maupun Twisted Pair Cable, yaitu ....

answer choices

- Fiber optic memiliki kemampuan jangkauan yang lebih Fiber optic sangat fleksibel dan mudah ditekuk pendek
- 🔵 Fiber optic lebih tahan dari ganguggan medan magnet 🏻 🔴 Fiber optic lebih murah dari kabel tembaga

Urutan Layer dari atas ke bawah yang benar adalah

answer choices

- Physical session Presentation Transport physical data link Network
- Aplication Presentation Session Network Transport 🧶
  - Data link Physical

- Aplication Presentation Session Transport Network
  Data link Physical
- Aplication Session Presentation Transport data link
  - Network Physical

Versi IP Address yang umum digunakan pada sistem jaringan komputer yang terdiri dari 32 binary bits dan terbagi menjadi 4 octet (1 octet = 8 bits) yaitu . . .

Jumlah host yang valid pada kelas C ( Classful ), sebanyak

- 16,777,216 Host per Subnet
- 65,536 Host per Subnet
- 512 Host per Subnet

answer choices

256 Host per Subnet

254 Host per Subnet
